HTB's Business Activity

HTB's business activities involves development of different types of software based on customer requirements and needs. We provide unique software development services since our company started. Our areas of works mainly in defense sector and government agencies where unique software solution is mendatory.

We develop simulation based softwares for our clients and provide them both technical and operational training and technical support team during the whole warranty period of the software. Currently we are working for development of highly sophisticated simulation software for one of our client in defense.

We develop network based database software for store and employ management of government organization. We work with international software developer to provide world class software solution in Bangladesh and provide training, warranty and maintainance support to our client on behalf of developer. In same cases, international developer trained our software engineers on their software, so that we can provide direct software maintenance, modification and upgradation soluitons.

Our other activities related to software development and IT infrastructure are listed below.

1. Software development
2. System & Network design
3. Database Systems development
4. Simulator Software development
5. Website and web application development

Hi-Tech Bangla (Bangladesh) Ltd.

Head Office: 210/2 Dr. Kudrat-E-Khuda Road ■ Sheltech Niribili ■ Suite # 4 E ■ Dhaka-1205 ■ Phone: +880 1192143312; +880 1192143313; +880 1193289444 ■ E-mail: info_htbbd@hi-techbangla.com; customersupport_htbbd@hi-techbangla.com ■ Present Address: 52 New Eskaton ■ TMC Building ■ 4th Floor ■ Dhaka-1000 ■ Web: www.hi-techbangla.com

HTB's Capability:

Hi-Tech Bangla (Bangladesh) Ltd. has highly experience and well knowledge expertise as its working force and has strong collaboration and partnership with worlds leading software developing companies. We had enough engineering skills to develop sophisticated software in house and can work side by side with our partners.

Our main focus in this field are Simulation based software and Database solution to our customers. No other company in Bangladesh has the opportunity to develop AD Radar Simulator for Bangladesh Air Force. We develop the whole simulator from the sketch and successfully delivered the simulator system too BAD. We currently providing warranty and technical support to our customer.
