## BACKGROUND OF THE COMPANY

Digital Network Communications (DigiNet) is a registered company in Bangladesh and doing business respectfully with International and Local customers since 2009. DigiNet is a Software solution provider, Software outsourcing, datacenter/collocation with server service support provider, remote IT support and solution provider which is dedicated to delivering to customers. DigiNet also set target to provide Branding Computer, Laptop and other hardware accessories.

We, the DigiNet, mainly providing all the service to the sister concern **Digital Network Communications Inc.** (Incorporated in USA and ITES service provider). At large and we are emerging fast as one of the leading IT solution providers in the world market by concern of our Service Headquarters of USA. We, at DigiNet aim to providing end-to-end ITES Solutions, Software Outsourcing solutions and hardware accessories to all wholesalers to end users, big corporate and other provider. We are ideally a team of highly result-oriented and well-trained professionals on ITES and Software Solution. DigiNet proven systems, processes and experience provide customers with a competitive advantage to manage dedicated solutions and the complexities of bridging the IT technologies to expand their business into new markets.

DigiNet is a rapidly growing remote IT support systems integrator and providing advantage to customers. DigiNet keeps its customers on the cutting edge of the rapidly evolving technical landscape.

DigiNet is dedicated to providing customers with the services, support and solutions that enable them to succeed. Several values are paramount to the daily operations and how we provide services. By renting equipment rather than buying it outright, our customers conserve capital and maintain the flexibility to upgrade their networks as their demand grows, as technology evolves and as their needs become more complex. Customers at large are using the rental service to build and deploy collocation/datacenter networks.

## OUR VISION

Is to become a strategic enabler to our customer's IT Enabled business infrastructure. We will continue to map our experiences and skills with customer business demands.

We are promise to create a dynamic platform for the universal ICT Bangladesh as well as international arena through modern ITES technology.

## OUR MISSION

To keep offering and supporting our customers with reliable ITES technologies and solutions to help them stay at the competitive edge of their businesses. Maximize the coverage of ICT globally, Especially in Bangladesh through providing.
